ULTRASOUND GROUP

Pelvic sonographic imaging in IBD

Advanced Virtual Workshop

Tuesday, November 26th, 2024

09:00 – 14:45 CET

Dear Colleagues,

Welcome to the IBUS pelvic sonographic imaging in IBD advanced virtual workshop.

Endoanal ultrasound (EAUS) and perineal ultrasound (PUS) are reliable imaging techniques that can be applied for the evaluation of perineal Crohn's disease (CD) and for the assessment of rectal involvement in ulcerative colitis (UC). Applying these techniques in your daily practice can guide early interventions and improve patients' outcomes, while decreasing the waiting time and costs of pelvic MRI, as well as reducing the need of endoscopies.

Through lectures and interactive sessions with discussion of selected videos, this virtual course will introduce you with the techniques of endoanal and perianal US, with specific emphasis on the assessment of anal muscle integrity, diagnosis of perianal sepsis, and on the assessment of rectal involvement of UC.

We look forward to meeting you virtually during the workshop!

Best wishes,

Dr Federica Furfaro and Dr Dan Carter
